DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 13-14, 5-8, 9-12, drawn to methods (2), system (1) and program (1) respectively for determining patent license fee data, classified in class 705, subclass 1or 400.
 - II. Claims 15-21, drawn to a method for determining exposure rate data, classified in class 705, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I (see claim 1) and II (see claim 15) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, they have different modes of operation and/or different effects as indicated above.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the applicant on 6/22/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
